Education

Siddhanath Science CampusNepal — **Kanchanpur, Nepal**
Bachelor of Science in Computer Science & Information Technology — *(BSc CSIT)2023 – Present*

Little Buddha Academy Nepal — **Mahendranagar, Nepal**
Higher Secondary Education (NEB), Science – Computer Science, Physics, Chemistry, Mathematics — *2021 – 2022*

Experience

Quality Assurance Engineer (Internship) Sep. 2026 – Present
GrowNepal
- Performing manual and automation testing, including test case design, bug reporting, and regression testing
- Building automated test suites using Python and Playwright, with reporting through Allure
- Using Postman for API testing and SQL for data validation

Quality Assurance Engineer (Internship) Jan. 2026 – July 2026
Kayo BadgerNepal
- Tested TabFlux.com from initial development through release, covering functional, UI, and regression testing
- Created test cases, documented defects, and verified fixes with developers
- Gained hands-on experience in API testing (Postman), bug tracking, and the SDLC on a React-based product

IT & Operations Intern (Internship) Apr. 2022 – Oct. 2022
Dipshikha Dhitopatra Karobar Co. Pvt.Nepal
- Rotated across IT/Technical, Demat/DP, and Customer Service departments
- Gained practical experience in financial services operations, client support, securities-related processes, and technical support

Projects

Argus | *Python, PyTorch, YOLO, OpenCV, FastAPI, React, PostgreSQL, Docker*CodeFest Hackathon
- Built Argus, an intelligent multi-camera identification system: a real-time AI surveillance platform that detects, identifies, and tracks people and vehicles across multiple camera feeds
- Recognized registered volunteers with a custom-trained model and assigned persistent IDs to unknown individuals
- Logged every detection event to PostgreSQL and streamed results to a live monitoring dashboard via REST API and WebSocket
- Built the dataset and annotations with Roboflow and trained detection models on GPU using Google Colab

AttendanceSNSC | *React 19, Vite, JavaScript, Firebase Auth, Cloud Firestore*
- Developed a web-based attendance system for BSc CSIT semesters and subjects, with Firebase authentication
- Implemented student-wise attendance marking, review before submission, and attendance history stored in Cloud Firestore
- Added Excel report export using XLSX and FileSaver.js, plus notices and support pages

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS
Testing: Manual Testing, Test Case Design, Regression Testing, API Testing, Bug Reporting, Playwright, Postman, Allure
Frameworks: React, Vite, FastAPI, Tailwind CSS
Developer Tools: Git, GitHub, Docker, Firebase, Roboflow, Google Colab, VS Code
Libraries: PyTorch, OpenCV, YOLO
